Tessellate

The Title

There's a good chance
I've got what you're needing
Cause you can tessellate the facts
And rearrange the pieces
We're a good bet
Something to believe in
There's a lot in what we've got
And a reason for this feelingYou're turning out to be quite possibly
The very best thing to hit that part of me
There's something in my heart that says you've gotta be
So I will iterate, tessellate, we'll be the perfect shapeI could give a little bit and you'd take
Think of the things we'd make
We'll be the perfect shape
If it takes a little more that's okay
So I will iterate, tessellate, we'll be the perfect shapeIf you want to
I can try to show you
How I came to the conclusion
That I simply had to know you
My thoughts were about you
Could not live without you
I would tessellate my life
Till I knew I'd work around youYou're turning out to be quite possibly
The very best thing to hit that part of me
There's something in my heart that says you've gotta be
So I will iterate, tessellate, we'll be the perfect shapeI could give a little bit and you'd take
Think of the things we'd make
We'll be the perfect shape
If it takes a little more that's okay
So I will iterate, tessellate, we'll be the perfect shapeI could give a little bit and you'd take
Think of the things we'd make
We'll be the perfect shape
If it takes a little more that's okay
So I will iterate, tessellate, we'll be the perfect shapeAnd we will find
Given the right time
We share a thing that we can't define
And if I try
I see it in my mind
And I know I'll never leave that behindAnd we will find
Given the right time

We share a thing that we can't define
And if I try
I see it in my mind
And I know I'll never leave that behindSo I will iterate, tessellate, we'll be the perfect shapeI could give a little bit and you'd take
Think of the things we'd make
We'll be the perfect shape
If it takes a little more that's okay
So I will iterate, tessellate, we'll be the perfect shapeI could give a little bit and you'd take
Think of the things we'd make
We'll be the perfect shape
If it takes a little more that's okay
So I will iterate, tessellate, we'll be the perfect shape
