

Scissors

Slipknot

I play doctor for five minutes flat
Before I cut my heart open, and let the air out
Three bugs, a pound of dust
Some wind spilled before me
In the strangest manner that had
Broke away my tear spoutAs I lie there
With my tongue spread wide open
A black widow had offered me
A sweetheart tube
As I injected
The candied heart that I selected
She said don't hesitate
Just do what you have to do to me!It's hard to stay between the lines of skin
Just 'cuz I have nerves, don't mean that I can feel
I wasn't very much fun to be with anyway
Just let the blood run red 'cuz I can't feelIt's hard to stay between the lines of skin
Just 'cuz I have nerves, don't mean that I can feel
I wasn't very much fun to be with anyway
Just let the blood run red 'cuz I can't feelBiding my time until the time is right
Biding my time until the time is right
Biding my time until the time is right
Biding my time
It's timeAs I lie there
With my tongue spread wide open
A black widow had offered me
A sweetheart tube
(Biding my time until the time is right)
As I injected
(Biding my time until the time is right)
The candied heart that I selected
(Biding my time until the time is right)
She said don't hesitate
(Biding my time until the time is right)
Just do what you have to do to me!
(Biding my time until the time is right)Biding my time until the time is right
Biding my time until the time is right
Biding my time until the time is right
Biding my time until the time is rightBiding my time until the time is right
Biding my time until the time is right

Biding my time until the time is right
Biding my time until the time is right

...

Biding, biding, biding, biding You, you, you, you
[Incomprehensible] Someone inside my [incomprehensible]
Everyone against me
Everyone beside me
Clawing away the pieces
Scratching away the excess
One more two more
Everyone wants more
One more two more
Everyone wants more
Inside the places that I hide from you
I want to see you splaying before me
You are the only one that I would rather see
Before me You want sex?
You need it?
You want sex?
You need it?
You want sex?
Do you need it?
You want sex?
You need it?
Don't lie
[Incomprehensible] I wanna die
I'd rather die
I wanna die
You [incomprehensible]
[Incomprehensible]
I don't need you any more
I don't need you [Incomprehensible]
