

Run

Extreme

Hey, let me know, let me know
Let me know when you get there
Hey, so you got to go, youre leaving what a pity
Hey, take your time, take a life time, time to find out
The world is yours so go out and get it And you Run, when you know theres no escape
You cant hide from your mistakes
Should have known it all along Hey, spinning round, spinning round
Paint the town as the world turns
Hey, hit the ground running round in circles
Hey, nothing new, nothing new, nothing new to discover
And you still havent found what youre looking for And you Run, when you know theres no escape
You cant hide from your mistakes
Should have known it all along
