

The Patriot Virus

Darkest Hour

We are the embarrassment to market suicide
Without eyes full, full of genocide
We live where flags can buy more than others lives
Where it's fashion to show your love for homicide
Of the victim we haven't seen enough For the victim escape that keeps them drugged
It's the best blood money can buy
It's the best way to fund genocide
A violent missionary sect feeds a bullet for every word against Salvation in a warhead the patriot virus is being
spread
The only antidote the give is to fear what's next
Prepackaged and advertised with a hymn
Singing anthems for the walking dead, fear what's next
