

Make You Move

Holly Elle

When you walked up in the club tonight
You must have been searching for something to make you feel alright
Tell me what youre doing standing up against that wall
Imma turn the beat up, turn the heat up, so you can hear my call Just let it go, yeah you know, that you cant
ignore the sound
Its gonna get you, itll infect you, youre gonna have to let it out
Oh This is gonna make you move, gonna make you move tonight
This is gonna make you move, gonna make you move tonight
Our bodies are rocking now theres no stopping
Theres nowhere to hide
This is gonna make you move, gonna make you move, gonna make you move
Gonna make you Now I got you feeling loose and having fun
Grab that guy or girl and show em how its done
Feel the rhythm let me see you bump and grind
Get as close as you can get, and leave the world behind Just let it go, yeah you know that you cant ignore the
sound
Its gonna get you, itll infect you, youre gonna have to let it out This is gonna make you move, gonna make you
move tonight
This is gonna make you move, gonna make you move tonight
Our bodies are rocking now theres no stopping
Theres nowhere to hide
This is gonna make you move, gonna make you move, gonna make you move Imma make you move
Imma make you dance
Make you show me what youve got youve got to come put up your hands
Imma drop this beat
You gonna catch that groove
Nothing you can do to stop it, pop and lock it
Imma make you move This is gonna make you move, gonna make you move tonight
This is gonna make you move, gonna make you move tonight
Our bodies are rocking now theres no stopping
Theres nowhere to hide
This is gonna make you move, gonna make you move tonight
This is gonna make you move, gonna make you move tonight
Our bodies are rocking now theres no stopping
Theres nowhere to hide
This is gonna make you move, gonna make you move, gonna make you move
Gonna make you move
