

I Like (Jost & Grubert Radio Mix)

Keri Hilson

Sun down Friday night up on city lights here I go start it out I like
Dressed up out the door so damn ready for one night maybe more

I like I like

Red strobe light hot boys dirty minds
when you crossed my way

I like to like

just you and I touched at first sight And the world around us
won't stop turning tonight

I like I like

I'm losing control right now
and i feel its right

I like I like

we're caught in this moment

I won't let you go

and the world around us

won't stop turn tonight

I like I like I like I like Hey there pure star lets go way to far
come a little closer

I like

hot looks up and down
with dancing on sleazy ground

bet you wanna get it on

I like I like You've got me down like a electrified
don't stop the ride

I like I like

just you and I here and now what a night

I I I And the world around us

won't stop turning tonight

I like I like

I'm losing control right now
but i feel its right

I like I like

we're caught in this moment

I won't let you go

and the world around us

won't stop turn tonight

I like I like I like I like Dance all night don't stop the music I like I can't refuse it
Dance all night don't stop the music I like I can't refuse it And the world around us
won't stop turning tonight

I like I like
I'm losing control right now
and i feel its right
I like i like
we're caught in this moment
I won't let you go
and the world around us
won't stop turning tonight
I like I like I like I like
