## Garbage

Burn down all your idols  
Destroy your idols  
Create a scene  
There goes all your reason  
It's helter-skelter  
It's not a dream  
Come down from the altar  
Remove your blindfold  
What do you see?  
Nothing left to do here  
There's nothing new here  
It's all the same  
You're going down, down, down  
How low can you go?  
You're going down, down, down  
How low can you go?  
You're going down, down, down  
How low can you go?  
Hare, Hare Krishna  
Was that your sister  
A cover girl?  
A wasted primadonna  
She lost her way here  
She disappeared  
Come back to your altar  
And build a fire  
It's getting cold  
Nothing stops to wait here  
There's not a soul here  
You're all alone  
You're going down, down, down  
How low can you go?  
You're going down, down, down  
How low can you go?  
You're going down, down, down  
How low can you go?  
Here we go now  
Hear the new religion

No inhibition  
No alibi  
Televised confession  
A true obsession  
Is on the rise  
Miscommunication  
Disinformation  
A perfect waste  
Bite the sacred apple  
Suck the poison  
Enjoy the taste  
You're going down, down, down  
How low can you go?  
You're going down, down, down  
How low can you go?  
You're going down, down, down  
You're going down, down, down  
How low can you go?  
How low can you go?
