

Feels So Right

The Griswolds

Follow me, dearest, despite all the fears in your soul
(Fears in your soul)
Come with me darling, it's easy, you need to let go
You're treading too carefully And nothing can save us
Already diving in and I'm gonna embrace it
Nothing's ever gonna save us
Nothing's ever gonna save us
But I wouldn't change this
As though so famous
Every time there's something amiss
With a little bit of sugar we can make it a hit
When it feels so high, it feels so right
Put out your hand and let me hold it
Put your body next to mine
When it feels so high, it feels so right
Put out your hand and let me hold it
Let's set fire to the night The day is breaking we're dancing and losing control
(Losing control)
We're rolling high, kiss the sky, drift into the unknown
We're treading so carelessly And nothing can save us
Already diving in and I'm gonna embrace it
Nothing's ever gonna save us
Nothing's ever gonna save us
But I wouldn't change this
As though so famous
Every time there's something amiss
With a little bit of sugar we can make it a hit
When it feels so high, it feels so right
Put out your hand and let me hold it
Put your body next to mine
When it feels so high, it feels so right
Put out your hand and let me hold it
Let's set fire to the night When it feels so high, it feels so right
Put out your hand and let me hold it
Put your body next to mine
When it feels so high, it feels so right
Put out your hand and let me hold it
Let's set fire to the night When it feels so high, it feels so right
Put out your hand and let me hold it

Put your body next to mine
When it feels so high, it feels so right
Put out your hand and let me hold it
Let's set fire to the night Nothing's ever gonna save us
But I wouldn't change this
Put out your hand and let me hold it
Let's set fire to the night
