

An Island

Chevelle

They said this fun, is near the end
You've worn out welcome way too fast
You'd better bite your tongue I need an island
And I need it fast
Some little island
Is all I ask Put, put you on
Put, put you on Stay there don't move
I think it's got fangs
Watch if they turn
Become the villains Are you allowed to know?
Are we allowed to know?
Are you allowed to know? Are you allowed to know?
Are we allowed to know?
Are you allowed to know? Just an island
Is all I ask
Some little island
A spot to cast To put you on
To put you on Force you to go Some little island
One little island To put you on (Some little island)
To put you on (One little island)
To put you on (To put you on, put you on, put you on)
To put you on (To pout you on, put you on, put you on)
