

# That's What They Say

## Buddy Holly

There comes a time for everybody  
When true love will come your way  
There comes a time for everybody  
That's what they tell me, that's what they say I didn't hear them say a word  
Of when that time will be  
I only know that what they say  
Has not come true for me You just keep waiting  
And love will come your way  
That's what they tell me, that's what they say There comes a time for everybody  
When true love will come your way  
There comes a time for everybody  
That's what they tell me, that's what they say I didn't hear them say a word  
Of when that time will be  
I only know that what they say  
Has not come true for me You just keep waiting  
And love will come your way  
That's what they tell me, that's what they say  
That's what they tell me, that's what they say
