Strike My Heart

Paris, Texas

yes i know that you hit me it was a mistake but you gave me a clean break from my steady job and a headache behind eyes it's easy if you try to quit but to fix it will take the stregnth of more than a million so strike my heart breath some air into my lungs i never thought it would get so dark but it does get much brighter than this i've got a daylight addiction and it doesn't get much brighter than this the neighbors show blind eyes but i know it excites it's a show that's better than tv what i write you'll erase can you keep a straght face yes i lose and no you win but you'll never do it again so strike my heart breath some air into my lungs i never thought it would get so dark but it does get much brighter than this i've got a daylight addiction and it doesn't get much brighter than this the world spins around and round and round and we don't hear a sound the world spins around and round and round and we're rotting on the ground and if i go to heaven you know i'll se my grandad he'll say he caught the biggest fish and hold his arms up 96 inches and if i go to hell i'll tell all your friends that you're doing well and it's nice how they all followed your advice i've got a daylight addiction and it doesn't get much brighter than this you've got to strike my heart
