

# 13 Going on 21

## Dead Moon

Shadows fell into our eyes  
Strangers we would seldom call  
    You and I like every teen  
    Were up against the wall  
We couldn't see the end in time  
    Dying to get out  
    13 going on 21  
They will never stop us now  
Going our way13 years in a wirebound  
    Just let the fire burn  
They don't think we can make it here  
    They gotted another thing to learn  
    Desperately I tried my best  
    To hold myself in tact  
    13 going on 21  
We're never ever gonna look back  
Going our wayTeenage eyes were open wide  
    Don't you think we know by now  
How foul and plagued our future cries  
    From what you've handed down  
    We can't explain the distant crash  
    Alter or defuse  
    13 going on 21  
We're learning by watching you  
    Going our way
