

Real Love

[Lisa Stansfield](#)

There will never be
Another love
For you and me Real love, where do you come from?
Real love, lead the way
Real love, where do you come from?
Real love, stay with me
Stay with me I need you baby
Like the birds need to sing
I want you always
For I cherish everything you do for me
Baby you set me free
It's you and me
For eternity Real love, where do you come from?
Real love, lead the way
Real love, where do you come from?
Real love, stay with me
Stay with me When your arms surround me
And you smother me in your sweet love
We let tender kisses
Loose on one another
We're not living in the shadow
Of someone we could be
There's no pretending
When we're together all there is honesty
Babe you set me free
It's you and me
For eternity Real love, where do you come from?
Real love, lead the way
Real love, where do you come from?
Real love, stay with me baby
Stay with me, baby
Stay with me
Stay with me I need you baby
And I know you need me too
We were meant to be together
There's something special in the things that we do
It's me and you
We're stuck like glue
'Cuz this love is true Real love, where do you come from?

Real love, lead the way
Real love, where do you come from?
Real love, stay with me
Stay with meReal love, where do you come from?
Real love, lead the way, baby
Real love, where do you come from?
Real love, I want you to stay with me
It's me and you
You'll never leave me, me and you
This love, it's me and you
