

# Spiteful Intervention

## Of Montreal

It's fucking sad  
That we need a tragedy to occur  
To gain a fresh perspective in our lives  
Nothing happens for a reason  
There's no point even pretending  
You know the sad truth as well as IOh god, the morning light  
Sun rays bring my paranoia  
I can't function unless I'm the only one awake  
Rancor of power  
Less conversation that  
... word you deform to  
Handicap me then  
Abuse your advantage  
I'm nervous my soul is returning to crystals  
Because your eyes are an agent of darkness  
This is not meant to fight  
It's just a bit of ...I spend my waking hours haunting my life  
I made the one I love start crying tonight  
And it felt good  
Still there must be a more elegant solution  
Lately I'm rotted in the filth of  
Self-offered agonies that really should  
Fill me with shame  
But all I have is the manic energy  
I lost my page in being the ...  
Disabling your heart collage  
Just want to celebrate me  
Need to suffer more  
Face ...  
Converts officiate  
Divides new stratagems to  
Disembowel our corptidium charactus  
I spend my waking hours haunting my life  
I made the one I love start crying tonight  
And it felt good  
Still there must be a more elegant solution  
I know I'm upside down about you  
Your kindness feels like blasphemy or some sick education  
On the limits of humanity  
So I profane the laws of some Victorian garbage  
And listen to you smashing up my studio again  
I spend my waking hours haunting my life  
I made the one I love start crying tonight  
And it felt good  
Still there must be a more elegant solution  
Lately all I can produce is psychotic vitriol

That really should fill me with guilt  
But all I have is asthmatic energy
