

# Everything (Between Us)

[Liz Phair](#)

We have everything we need here  
We have everything between us  
You have nothing left to fear, dear  
'Cause it ain't ever gonna leave us We might get a room downtown, now  
Get away for a half day  
We might drive a car down to the next town  
Get away from our family Let your body move real slow  
Tell your body we left yesterday  
Let your body hold me close  
Let your body move you We have everything we need here  
We have everything between us  
You have nothing left to fear, dear  
'Cause it ain't ever gonna leave us Let your body move real slow  
Tell your body we left yesterday  
Let your body hold me close  
Let your body move you Let your body move real slow  
Tell your body we left yesterday  
Let your body hold me close  
Let your body move you Let your body move you  
Tell your body we left yesterday  
Let your body hold me close  
Let your body move you We have everything we need here  
We have everything between us
