

# Wish U Were Here

Jamie Foxx

By the time you get this letter, I might be doing better  
It's kinda hard trying to survive in all this crazy weather  
Everybody wants my number, everybody's calling my name  
But in the midst of all of this I can still hear you say "Son walk up right and straighten your tie  
You don't want one of them good jobs to pass you by  
Don't act no fool, I'm watching you  
And now that you're gone, it still feels like you do, I wish "I wish u were here to see the things I've done  
I wish u were here, you'd be so proud of your son  
I wish u were here to celebrate with me  
I wish u were here Now all of these people ask me, is it lonely at the top  
Or do I find comfort in all the things I got?  
Well, these cars keep me moving, these planes keep me high  
A million dollar home but I'm barely getting by 'cause I miss our talks, one thing you used to say  
When things got hard, get down on your knees and pray  
And then those walks, it's just the simple things  
We still do all of this but only in my dreams, I wish I wish u were here to see the things I've done  
I wish u were here, you'd be so proud of your son  
I wish u were here to celebrate with me  
I wish u were here But sometimes I wonder why  
Why can't you still be here with me  
Wish God would've waited a couple more years for you to see  
I'm trying to stay strong, barely holding on I know I'll see you again but for right now rest in peace  
And when I get to heaven, first thing they'll say to me  
Tell me have you seen Estelle Marie Tallie  
Find out where you are, run into your arms  
Wrap your wings around me and whisper in my ear  
"Well done, well, well done my son, well done, well done, oh" I wish u were here, you'd be so proud of your son  
I wish u were here to celebrate with me  
I wish u were here
