

# Time

## Rebel Meets Rebel

We have one nanosecond  
In the spectrum of time  
Cause it's about the dead  
It's all in your mindReality, senility  
Human race, outer space  
My head's about to overload  
Explode, explodeAlien forces live inside my brain  
I must obey them or I'll go insaneProcreation, cocentration  
Penetration, ejaculation  
My head's about to overload  
Explode, explode  
Explode, explodeCold shots on the rocks  
You know how it makes me feel  
You better see, set me free  
Don't give me no better deal  
Anagram, sonogram  
Looking for a thing that's real  
All for sale, new ghost townTime is something you can't steal  
Time is something you can't steal  
Time is something you can't stealThis black painted sign says:  
"Jesus saves"  
Ride on the highways  
To an early graveRemorse, intercourse  
Voices from my alien force  
My head's about to overload  
Explode, explodeCowboys From Hell on the radio  
Turn it up now  
Just as loud as it will goGuitar bastards, cymbal crashers  
Strobe light flashin', motel bashin'  
My head's about to overload  
Explode, explode  
Explode, explodeCold shots on the rocks  
You know how it makes me feel  
You better see, set me free  
Don't give me no better deal  
Anagram, sonogram  
Looking for a thing that's real  
Ultrasound, vocals downTime is something you can't steal  
Time is something you can't steal

Time is something you can't steal We have one nanosecond  
In the spectrum of  
Time is something you can't steal Time is something you can't steal  
Time is something you can't steal Time is something you can't steal  
Time is something you can't steal We have one nanosecond  
In the spectrum of time  
Time is something you can't steal
