

# Flicker

## Marlon Roudette

When I saw you waving like you meant it  
Tell me do I read it wrong?  
It doesn't mean it's over, doesn't mean it's broken  
I just need you to respond So what's the matter? What the matter my love  
Why do you saw  
You know you could take us, you could take us, my love, almost everywhere  
From a whisper to a scream  
A flicker to flame  
When I say your name, when I say your name, your name, your name  
Live our life in phases, made this strangers and crazy  
Tell me am I crazy then?  
Cuz I receive the signals and constant information  
It seems to me you're everywhere So what the matter? What the matter my love  
Why do you saw  
You know you could take us, you could take us, my love, almost everywhere  
From a whisper to a scream  
A flicker to flame  
When I say your name, when I say your name, your name, your name Am I giving up all to you now?  
You could feel the flame now?  
And all I want is you to know  
If you see me in a faded light  
All that I could do is promise that I'm with you in different times  
So what's the matter? What the matter my love  
Why so you saw  
You know you could take us, you could take us, my love, almost everywhere  
From a whisper to a scream  
A flicker to flame  
When I say your name, when I say your name, your name, your name From a whisper to a scream  
A flicker to flame  
When I say your name
