

# Don't Leave Me Alone

## Live on Release

When I first saw you I was young could not control my dreamin'  
I looked into your eyes and found it too hard not to fall in  
Tried to ignore that I wanted you then found out you wanted me more  
Now it's just you and me against the world  
I sing 1234 Have a feeling that you 'll have me forever  
You're just a habit and I can't give you up boy  
Even when you let me down [Chorus]  
Don't leave me alone  
My fears will come creeping back and I will fall apart  
Don't leave me alone  
I'm weak I can't handle it  
I can't handle this You see the world a different way without you I'd be strugglin'  
When I'm alone at night I feel that I am missing something  
Tried to ignore that I needed you then found out you needed me more  
Now it's just you and me and we have something worth fighting for Gotta believe me when I say that I need you  
Even though I might not say it enough boy  
I'll be true as long as you [(Chorus) 2X] I can't handle it I can't handle this  
I can't handle it I can't handle this
