

Rosary

I Can Make a Mess Like Nobody's Business

I finally found a way back into your stare
And when I took you back you told me I was always there
Then you close your eyes and hide inside your head
And when you run away you told me I was better then Said well, Rosary, we can find a way around
Even if you run away, I will find a way to hold you around. We said let's go away to a place we thought we left
Where we can close our eyes and then pretend that we were kids
And if I fall away, you'll be my guiding eyes
Even if we run away, we'll find a place to hide You said, well, Rosary, we can find a way around
Even if I run away, I will find a way to hold you around Said, well, Rosary, we can find our way around
Even if we run away, we can find a way to hold you, hold you down
Hold you down. Even if you run
Even if you run They found me in a hole behind your house
A little dusty, shaken up, and hollowed out
I'll follow you to make sure you got home
Then I saw you had someone to hold you, I was lost. I said well, Rosary, we can find our way around
Even if you run away, I will find a way to hold you around Said, well, Rosary, we can find a way around
Even if you run away, I will find a way to hold you, hold you down.
