Emergency! Emergency!

The Promise Ring

Sometimes I wake up early to say goodbye
Just in case you don't come back
I know the coffee leaves by car
Because it goes fast really far
Then that's where you areAnd soon the room can't tell you were here
And there's dust in my hair
And dusty air has gone crazy
For something late in the year and water everywhereSometimes I wake up early to say hello
Tell you everything you already know
So early I start watching the bed
Where we are attacked and we are oneWe come all undone when I come around
Some lost and some found
I know you'll be here on the ground when I come around
I'll come around, come around, come around then I'll go around
Very emergency, SOS
