

His Burden

Dehumanized

Bury us now
In this world of inhibition
A dwindling torch must light the path
A paradox
Parallels
The form we take in every fuckin' way
Beneath the flesh
The soul of man
Struggles to breathe
Eternally
The horrid stench
Consumes my thought
The falling ash
Reveals my insanity

To die, to learn, to burn
In impurity
To die, to learn, to burn
In impurity

With each hour the death of me proceeds to take shape

Collaboration of pain and lack of will
Sharpens the blade and drives the urge to kill
Demonic plague of right and wrong
Ruins of waste rest inside of me

Prolific hatred is what conquers my entire being
Tragicallt the reason for passopn has been dead and gone
This resolution that I see fit is unpopular
The end of days will hold destiny in my own hands
Destiny in my own hands
Tearing apart the mind
Diminishing the soul
Destroy

Collaboration of pain and lack of will
Sharpens the blade and drives the urge to kill
Demonic plague of right and wrong
Ruins of waste rest inside of me
