

Recipe

Aura Dione

Hold me like Im a baby
I will always be safe in your arms
Im filming and I'm dreaming
Im humming my way to the starsI can reach the stars from where I am
I can reach the stars from where I amTell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermoreStand by me I am your baby
You will always be safe in my arms
This season I dont think about reason
I just wanna lose it and wish upon the starI can reach the stars from where I am
I can reach the stars from where I amTell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermoreWe can take it far, to the morning star
A thousand children laughing in your eyes
You were made for me, baby cant you see
The endless sky is filled with butterfliesTell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermoreTell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermore
