

Faith

Union 13

You came to my doorstep
When I was still real young
You tried to recruit me
And made me speak in tongues
You said there was only one
You said if I didn't pray with you, I'd go to hell
And I'd better repent right now
I did as you said, 'cuz right then I was real scared
Man, I just wanted out
I want to see for myself
A miracle cure, a bleeding statue
The truth is surely out there
But who's in control as destiny unfolds
Believe in what you will 'cuz you're free to decide
If I haven't felt it probably isn't there
My faith in science I just cannot hide
I should exist and then so should you
Our ideas differ, but which one is the truth
I don't need another to lead me through
I'll learn what I can until my rebirth
I want to see for myself
A miracle cure, a bleeding statue
The truth is surely out there
But who's in control as destiny unfolds
You want to control the world, imposing your will
Rejecting rational thought, what is real
Is not relative and untrue according to you
Don't try to corrupt my mind, it won't work
I want to see for myself
A miracle cure, a bleeding statue
The truth is surely out there
But who's in control as destiny unfolds
