

The Immortals

Unleashed

Rise - my armies - with power - from Hell - we march...When all their power's gone and nothing's left but
shame

We are the evil ones, a pestilence they say

We tear their souls apart by just being what we are

...And to forever be the ones to blameThere's nothing here for us in their world of love and trust

We vomit in their eyes and face them with disgust

We are the tyrants of the darkness as they say

...And we will never obeySo rise - my armies - with power - from Hell - we march...We leave your god behind,
he's shaking with fright

See the hatred in our eyes shining so bright

Possessed by Hell itself we stand up to charge

...And rise from the flamesThis is the time for vengeance, now their end is near

We strike with hateful power, we have no fear

We are the immortals of a never ending race

...And we shall fight 'til the endNow the time has come

For all the fools to pray

Come on, face the slayer

Now's your time to paySo rise - immortals - with power - and might - we slay...
