

Smoke Around the Bend

Small Black

Quietly, I asked them what
this place was for
nobody could recall
in the distance
Watched the traces left of the crane
their story was the same
Smoke around the bend
Fire in the east
places I pretend to reach
Smoke around the bend
drone assures me
I'm still here
out on the breadcrumb trail
but leading out to where?
Found the clearing on the map
strangely made to scale
of the studio sky
Smoke around the bend
Fire in the east
what did I intend to see?
Smoke around the bend
oh I'm bound to seek september
in the valley of the moon
