Finally

The Frames

did you fall on your way
its a long way down
welcome back to your place
i hope you know it now
cause its true what you say
were the wrong way round

and the lie that cut the worse
has been resolved, then reversed

finally..

ah come on.. show the way
where are you running now.
is it lack of restraint
has you turning round.

and in the end, were both the same
you played your part, so your part to blame

when you want something that much,
it's drawing trouble on your life
and when you found something that good
its hard to focus on what's right

and in the end what hurt the worst
has been resolved and the reversed
and i know its not what you said
its like the letter i just sat and read

finally..

you found something so good
its drawing trouble on your life
and when you lost something so good
its hard to focus on what's right

i love it so far..
