

Clouds

[Jona Selle](#)

[Verse 1]

Remember, when we were a little younger
Everything was good, everything a joke
I thought you would have lost the picture by now
Thought you threw it out, thought that you moved on[Pre-Chorus]

So I keep on thinking every day
I keep on running, running far away[Chorus](2x)

Today I got my head in the clouds
Today I gotta figure it out
We haven't really talked for a while now
We haven't really made a soundWe haven't really figured it out[Verse 2]

I'm standing here, staring at your number
Thinking of your face, thinking of the past
To [lay?] the things around, always remind you
Like the [?] of me, like something's gonna miss some piece[Pre-Chorus]

So I keep on thinking every day
I keep on running, running far away[Chorus](2x)

Today I got my head in the clouds
Today I gotta figure it out
We haven't really talked for a while now
We haven't really made a soundWe haven't really figured it out[Bridge](2x)

I wanna be there by your side
To wipe the [venture?] from your eye
We both live under the same sky
Where keep on running far away[Chorus](2x)

Today I got my head in the clouds
Today I gotta figure it out
We haven't really talked for a while now
We haven't really made a soundWe haven't really figured it out
