Cut Your Roses Down

Inxs

And it comes down to this
When you take a look
Got to find a reason, find it out
What the funk is about
All you lovers take a look around
Before they cut your roses down
All they have is bones and blood
Don't they know that love is around?
Make the way through the pain
You got no one to blame
Put a rope around, push into the ground
All in the name of love, hey!
All you lovers take a look around
Before they cut your roses down now
All they have is bones and blood

Don't they know that love is around?
Meet the devil within
And that's a name not a friend, that's right
It come around and knocking down doors
When you let him in, gonna burn again
All you lovers take a look around
Before they cut your roses down
All you have is bones and blood
Don't they know that love is around?
All you lovers take a look around
Before they cut your roses down
All they have is bones and blood
Don't they know that love is around?
