

# Words

Jay Sean

Uuh, uuh, uuh, ooh baby, yeah  
We can run out we can fly  
We get caught in traffic yeah  
We can sink or we can swim all just look like passing...  
We can survive or let it die, it's only one way this can go  
Do we know exactly what we saying  
I never thought I'll end here like this with you  
And our future now depends on the words we use  
At the end at the line and now it's time for us to choose  
This ain't how I picture it out  
But bay here we are standing face to face in a moment things could change  
Be careful after words we say  
'cause this is go too far like bullets shots in space  
We've been going that ...  
Be careful after words we say  
The word we say  
Wrapping here, wrapping here you said never again  
And here we are, I see you're scared to even look at me  
Cause you like I do cause this might be just the end  
I need to wake up, something got to give in  
I never thought I'll end here like this with you And our future now depends on the words we use  
At the end at the line and now it's time for us to choose  
This ain't how I picture it out  
But bay here we are standing face to face in a moment things could change  
Be careful after words we say  
'cause this is go too far like bullets shots in space  
We've been going that ...  
Be careful after words we say  
The word we say  
Lay down, lay down, lay down and calm down...  
Lay down, lay down, lay the words we say  
Oh,  
Lay down, lay down, lay down and calm down...  
Lay down, lay down, lay the words we say  
Oh  
Thank you baby, take a minute to your self casus this ain't how I picture us, this ain't how I picture us,  
But bay here we are standing face to face in a moment things could change  
Be careful after words we say  
'Cause this is go too far like bullets shots in space

We've been going that ...  
Be careful after words we say  
The word we say
