Winter Hill

Doves

Wherever you go you will be with me
And when you do talk you'll be talking to me
But just save your words as we walk on by
With the sky full of birds and the dusk approaching
Climb the long grassy track to the top of winter hill
Climb the real rocky track to the top, I'll see you back
I'll see you back on winter hill
Wherever you go you will return safe
And when you will walk you'll be walking with me
But if comes the day you meet someone new
You will be with them but I'll be thinking of you

Climb the long grassy track to the top of winter hill
Stay with me, see so far at the top, I'll see you back
I'll see you back on winter hill
Well, she travels far and we stay apart
But she crossed her heart on winter hill
Climb the long grassy track to the top
We can't turn back, oh
Climb the real rocky track to the top of winter hill
See you back on winter hill
