## My Car

## **Gin Blossoms**

Streetlights on, the night air's cool I'm driving right past my old school I'm looking for my pack of cigarettes I'm thinking back on things I've done I can't forget the stupid onesIt seems I do my best by accident What's that sound? What's that song? What's this street I'm driving on In my car, in my car? I miss her feel, her touch, her taste I feel the distance everyplace This distance can't be taken casually I take my time, just drive around Feeling lost in my hometownEvery turn I take is comforting What's that sound? What's that song? What's this street I'm driving on In my car, in my car?I'll take a break from all their big plans My first mistake was listening to them I made a mess it's all been proven Over and over again Over and over againStreetlights on, the night air's cool I'm driving right past my old school Looking for some face I can't forget I take my time, just drive around Feeling lost in my hometownEvery turn I take's an accident What's that sound? What's that song?
