

You're My Favorite Song

Joe Jonas & Demi Lovato

Words don't come easy without a melody
I'm always thinkin'
In terms of do-re-mi
I should be hikin', swimmin', laughin' with you
Instead I'm all out of the tune
But what you don't know
You lift me off the ground
You're inspiration
You help me find myself
Just like a bass line in half time
You hold down the groove
That's why I'm counting on you
And if I heard you on the radio
I'd never want to change a single note
It's what I'm trying to say all along
You're my favorite song

I'm in a session writing tracks
You got another class to teach
I'm in rehearsal with the band
You're always one step out of the reach
I'm looking for some harmony
With you it comes so naturally
You help me find the right key
And when I hear you on the radio
I never want to change a single note
It's what I tried to say all along
You're my favorite song
(my favorite song)
And when I hear you on the radio
I never want to change a single note
It's what I tried to say all along
You're my favorite song
You're my favorite song
