Shooting Stars

Cider Sky

Hey, hey, hey
Hey, hey, hey
Hey, hey, hey
Hey, hey, heyIgnite the fire light
Tracing all the elements
Dancing like were in the air
Feeling the night flow-ing through
Feels like a day dream
Im catching every word you say
Isnt this a perfect day?
Well watch the sun kiss the moonTheres a light that brings us together now
And it moves like a shooting star
From your heart straight to mine
From your heart straight to mineAnd every single thought that is beautiful
Watch it fly like an arrow on fire
From your heart straight to mine
From your heart straight to mineDaylight is breaking
Were talking like well never speak
Dancing like well never see
Feels like Im falling too deepHere we are are are
On the star-ar-ars
And we rise and fall
And we want it all
Here we are
Here we are
Here we are are areTheres a light that brings us together now
And it moves like a shooting star
From your heart straight to mine
From your heart straight to mineAnd every single thought that is beautiful
Watch it fly like an arrow on fire
From your heart straight to mine
From your heart straight to mineHey, hey, hey
Hey, hey, hey
Hey, hey, hey
Hey, hey, heyTheres a light that brings us together now
And it moves like a shooting star
From your heart straight to mine
From your heart straight to mineAnd every single thought that is beautiful
Watch it fly like an arrow on fire

From your heart straight to mine
From your heart straight to mine
