

Dream

Sean Lennon

Another zone
The time moves slowly
Like a foreign film
With no sub-titles to explain
Can you see what I mean
I know it's just a dream
I've lost my laser beam

The skies are blue
Cream and purple circle
The waves break where you want them to
Can you see what I mean
I know it's just a dream
I've lost my laser beam
Duma's hard core part
