

# Don't Go

## En Vogue

I'm so glad to see you  
Now I have the chance to say  
Our love's been growing freely  
What must I do to make you stayDon't goI feel the time is right  
'Cause my love for you has grown  
Up until this very night  
I had doubts your love was strong enough  
To break me down  
Now I'm caught up in this web  
You've spun for me tonightDon't goIt takes a gifted man  
To release the love in me  
So far you're the only man  
Who has gone this far for me  
It feels it's out of my hands  
Can't think twice, it's much too right  
This may be my only chanceDon't goI've been such a fool  
To have kept my love for you  
Could have lost your love  
Searching for the truth  
Don't go nowhere, you know I care  
Stay right here with me forever, babyDon't goLet's make sweet love tonight  
I won't put up any fight  
Your wish is my command  
Lay me down upon my bed  
And make me feel the heat  
Of your body next to mine  
I just have one demandDon't goYou send chills down my spine  
I surrendered all my love  
You captured all my life  
In just one night of ecstasy  
You brought me to my knees  
Your first bite was just too strong  
You left a scar on meDon't goI've been such a fool  
To have kept my love from you  
Could have lost your love  
Searching for the truthDon't goI'm so glad to see you  
Now I have the chance to say  
Our love's been growing freely  
What must I do to make you stayDon't go
