

Take Your Time

Jefferson Starship

I'm gonna make one hour fit in a just a few minutes

I'm gonna get two days for the price of one

There's a one word rhyme and that's called living

Thare's a one word love, means plenty of giving

I'm gonna give it 'til I'm doneBut everybody keeps telling me to take it easy

But time doesn't sit down and wait while I'm trying to get it done

But you're not me, thank God, you can take your time slowly

Makes me fell good just to watch you lie down and have your funTake your time, take your time

And I'll take my own time

Take your time, take your time

And I'll take my own time

Take your time, take your time

And I'll take my own timeI can take it slowly or I can keep runnin' on, runnin' on

When I put one foot in front of the other

To me that doesn't mean walk, that means run

I always wanna start the race before the gates open

I always wanna start the race before I hear the sound of the gunBut everybody keeps telling me to take it easy

But time doesn't sit down and wait while I'm trying to get it done

But you're not me, thank God, you can take your time slowly

Makes me fell good just to watch you lie down and have your funTake your time, take your time

And I'll take my own time

Take your time, take your time

And I'll take my own time

Take your time, take your time

And I'll take my own timeTake your time, take your time

And I'll take my own time

Take your time, take your time

And I'll take my own time

Take your time, take your time

I'll take my own time

Take your time, take your time

I'll take my own timeYou say it'll take you a year, I'll say it does take me a second

But there's room for both of us, just open the room

You know a year of time sees so many changes

But the speed of light in the black of night makes a full moon
