Landmarks

Plankeye

Are you here to stay? Why should I ask?
The water's warm, my friend, this one should last
Landmarks that define no longer align with the direction we're heading
It's the consequence I fear when you label me like thatI guess I wish you'd take some time with me
The words I spoke were clear
Some people only hear what they want to hear to make them feel alright
Landmarks that define no longer align with the direction we're heading
Landmarks that define no longer align with the song we're singing
