

Nite After Nite

Music Go Music

whenever i'm alone with you everything we can do comes easily, so show me your energy
everything else indeed, until the morning breaks hold on to me, you all belong to metonight we'll let it go and
let it flow and let it burn into the morning light
night after night it seems to be a dream, i never want to wake up anymore
night after night, night after night
night after night, night after nightwe can create our own, emotion and blend it down, insanity, whatever the
night is herenight after night i try, i can't deny, i'm only living if i feel alive
this gem is taking off before we break it up
let's make it to another level
tonight we'll let it go and let it flow and let it burn into the morning light
night after night it seems to be a dream, i never want to wake up anymore
night after night, night after night
night after night, night after night
night after night, night after night
night after night, night after nightwhenver i'm alone with you everything we can do comes easily
so show me your energynight after night, night after night
night after night, night after night
night after night, night after night
night after night, night after night
night after night i try, i can't deny, i'm only living if i feel alive
this gem is taking off before we break it up
let's make it to another level now
tonight we'll let it go and let it flow and let it burn into the morning light
night after night it seems to be a dream, i never want to wake up anymore
