

# How Can We Be Strange?

## Bis

Please, send a message to all the people  
Who find their pleasure in being normal  
Please help them to see, they can be different  
Although their lives make it hard to see it I get frustrated when I walk in town  
But it's not my place to tell them now  
That they can think strange, they can be different  
So I go home and imagine everyone saying How can we be strange?  
How can we be strange  
When we've got work to do today? Please understand this, I'm not a fascist  
Just wish that folk wouldn't be so passive  
Toward the freak in the subconscious  
It's in us all so don't be so cautious
