Facing The Wind

The Fixx

Just give me something to hold on
A piece of the world that won't go wrong
Is there somebody there I can talk to?
Somebody sharing the same view?
Facing the wind
One avenue that would lead to
A place on this earth, where we all grew
Longing for travel, we stood still
Watching a sky that was once blue

Facing the wind, facing the wind
Facing the wind, facing the wind
Each line we throw, gives us false hope
One ray of light, God, I can't cope
Thinking about what we all are
One human race that's gone too far
Facing the wind, facing the wind
Facing the wind, facing the wind
