

Heartbreak Dream

Betty Who

[Verse 1:]

It's you and me

It's slow dancing to anything playing

It's us colliding

It's never finding when we should say when I-I-I can feel it

When I look in your eyes so clearly

I-I can see that you need me

And all that we was

I-I can taste it

All the days that you've been wasting

I know that you can't face them

And all that we were [Chorus:]

In a moment

You were everything to me

In this moment

We're living in a heartbreak dream We're living in a heartbreak dream [Verse 2:]

It's holding hands

It's making plans that we never keeping

It's silent driving

It's always finding reasons to sleep in Ah, ah, can you hear me?

I'm yelling and you can't hear me

Can you feel me, and all that we were?

I-I can taste it

All the days that we've been wasting

I-I know that you can't face them

And all that we were [Chorus x2] We're living in a heartbreak dream

We're living in a heartbreak dream [Bridge:]

When you hold me it feels like you don't know me

We are worlds apart

When you kiss me I know you haven't missed me

You keep breaking my heart [x3] [Chorus] We're living in a heartbreak dream

We're living in a heartbreak dream
