

Culture Wars

The GC5

I gonna be a soldier in the culture wars
They battle in the Capitol, they battle in the streets
It time to battle back with our minds and with our feet
And as the war is waged on the everyday slaves
They proclaim our problems stem from lack of purity
They blame the immigrants, the gays, the blacks, the jews
They wear a smile as theye tightening the screws
Theye giving orders to fence up the border
As they congratulate themselves on being born here
