

Too Young To Die (feat. Lolene)

[Lindsay Lohan](#)

I knew I was in trouble from the moment I laid eyes on you, yeah
Dangerously, I could feel the chemistry around the room, oh
Something deep inside told me to think twice, I knew, yeah
But I went ahead what a stupid thing to do
Now I'm in trouble Hit by a train, fallin' from a building,
Heartbreak from you be like drinking deadly poison
I'm, oh, I'm too young to die (I don't want to die)
Crashing my car, comin' flying through the windshield
Falling in love wit you, I'm heading to get me killed
I'm, oh, I'm too young to die I could see you coming like a weather warning on the news
Like a twister

Like a Venus flytrap, I'm drawn so please be careful, I bruise.
If you were in my place, would you turn and walk away, be through
I must be out my mind and you could do some time, it's true Hit by a train, fallin' from a building,
Heartbreak from you be like drinking deadly poison
I'm, oh, I'm too young to die (I don't want to die)
Crashing my car, comin' flying through the windshield
Falling in love wit you, I'm heading to get me killed
I'm, oh, I'm too young to die I don't wanna die this way
Get caught in the middle and for just a little, my heart could break
I'm just another victim of love (victim of love)
Every time I love Hit by a train, fallin' from a building,
Heartbreak from you be like drinking deadly poison
I'm, oh, I'm too young to die (I don't want to die)
Crashing my car, comin' flying through the windshield
Falling in love wit you, I'm heading to get me killed
I'm, oh, I'm too young to die
