

What A Change

Bread

You could be the answer to my lonely dream
It's my only dream, dream it every night
It's about a girl who makes the waters still
Takes my troubled mind and makes it all seem right
Oh, what a change, what a change that would be
I can feel it comin' over me
Maybe it's strange, strange to say
But I can't remember how, how it used to be
You could be the answer or another dream
Just another dream, how will I know
I'm afraid to wake up now and face the day
Comes the light of day, she'll have to go or stay
Oh, what a change, what a change that would be
Just to wake and find you still here
'Cause every time, time before
When I open up my eyes you always disappear
We could sit and hope that you'll be seen
We could talk about the world and in between
And when the morning light was through
Then I could see if it was really you
Oh, what a change, what a change it could be
I just hope it's comin' over me
I know it's strange, strange to say
But I can't remember how, how it used to be
Oh, what a change, what a change it would be
Can you see the comin' over me
I know it's strange, strange to say
But I can't remember how, how it used to be
