

# Undone

## I Mother Earth

Living alone, body shaking  
Cars outside they're singing their songs  
The candles wave and I get to thinking  
How people see things and deal with them in different ways  
Trying to move forward like a walk underwater  
Two steps back like a walk through silent streets  
I've heard the word, guess I'm tired of trying  
Everybody I'm saying the pop is gone  
Fighting the fight with the waterline  
Catching breath and a dirty breeze  
What's been used up has been more than needed  
One river rolling, two rivers going dry  
I'm down undone  
I'm down undone then gone  
Behind, beyond  
Soft hands that touch the sun  
I'm down undone  
I'm down undone then gone  
Behind, beyond  
Soft hands that touch the sun  
Down, down, down, down, I am
