I Love You Anyways

Travis

You were on my mind inside the cinema
You looked so beautiful I almost had to go
When I got outside I thought of you again
I think you should be framed in some Fine Art galleryI know you'd disagree with me
But I love you anywaysShould I climb high my dreary city walls
They make me feel so small oh let me fade away
This city's so cold and old forever rain or snow
I'd really love to come and go oh won't you go stay with meI know you'd disagree with me
I just know you'd disagree
But I love you anywaysYou were on my mind inside the cinema
You looked so beautiful I almost dried an eye
And when I got outside I caught the 44
It dropped me outside my front doorForgot what I'd been living for, hey
