Here With You Now

Grabbitz

I see your face in the crowd
But you don't seem so far away
The only thing between us is empty space
Empty space
Even when the music is loud
I'd rather be no other place than here with you now
Here with you now
Here with you now

Here with you now

I'd rather be no other place than here with you now

Here with you now

I'd rather be no other place than here with you -

Here with you now

I see your face in the crowd
But you don't seem so far away
The only thing between us is empty space
Empty space
Even when the music is loud
I'd rather be no other place than here with you now
Here with you now
Here with you now

Here with you now

I'd rather be no other place than here with you now

Here with you now

I'd rather be no other place than here with you -

Here with you now
