Run for Cover

Tony Joe White

Lightinin' streets
That you can hear the thunder
I see your face
I can't help but wonderPraying for a dime
It feels like trouble
When you see me calling
Better run for coverHalf body heat
It started global warming
Mary, you and me
We can calm the storm andRain falling down
Feels like trouble
When you see me calling, baby
Better run for cover, babyRun for cover
Better, better, better, better
You better run for cover
Better, better, better, better
You better run for coverWould you dance with me
Ohh, you got me flying
You're like electricity
Tip or tears arisingRain falling down
Feels like trouble
Here, baby
Should've ran for coverDarling, better run for cover
Darling, you better run for coverBetter run for cover
I'm right here now babyBetter run for cover
