The Tony Rich Project

How many times do we fall in love, memories that pay attention
The clock is ticking for everyone, time out for all the nonsense
How many stars in the universe, long beach shores and foreign countries
It's like we change when the planet turns, kiss clouds and make us all beFree, just let us be
Don't make me cry, just let us fly
We're making our own worldWhat your thinking your getting now, your the first to take for granted
Freedom is loving a different phase, watch out it's happening again
Did you feel like you owe me now, everything that I did not do
Follow me if you can't do, this is the time we becomeFree, just let us be
Don't make me cry, just let us fly
We're making our own worldUndo this hold on my breast, time just won't let it fade away
These great thoughts will manifest, thinking life over now
Kiss clouds and make us all beFree, just let us be
Don't make me cry, just let us fly
We're making our own worldFree, just let us be
Don't make me cry, just let us fly
We're making our own worldFree
Don't make me cry
We're making our own worldFree, just let us be
Don't make me cry, just let us fly
